#### May We Be Saved From Ourselves

One of the most trying and arduous years this country has ever endured has now become history. 1950 surpassed even the war years in bringing grief and unhappiness to this great nation. In times of trouble we have always been a united people. Ideologies, strange isms and even partisan politics have never heretofore caused us to be a divided nation, yet the past year found us lacking in unity and that never die American\_spirit.

We have always been blessed with outstanding leadership, and today we find ourselves not so fortunate, and with a house divided. We have been outsmarted by Communist Russia and its satellites who are striking at the very bowels of this country. Unless we stop and take inventory of our situation we are headed to defeat and slavery.

Russia is not going to war with us. They have carried on a cold war since the end of the fighting in World War II, and have accomplished far more through this medium than by engaging us in battle. They are gradually alienating, either through fear or persuasion, some of our allies. to a point where they are attempting to have us follow a course of appeasement. The attack of the Chinese in Korea is of Russian origin. They know full well we are a courageous people, and, once engaged, will fight to the bitter end poses. for what is right and just. Their hope is to keep us so engaged in attempting to liberate Korea for many years to come. The Communist leadership is not as dumb as many of us would think, their diplomatic corps has certainly outwitted us up to this time. They have urged us on and on other building. Whereupon Maj until today we feel that all of the ills of the world rest upon Gen. T. W. Herren, army commandour shoulders and that we are the only one capable of saving | er in the District of Columbia, it from destruction at the hands of the communist. Exactly what Joe Stalin and his cohorts want. They are going to fight us in an economic battle. We have always been a peaceful nation, carrying small armed forces and spending little for armanents except in time of war; and to-day we are faced with a situation of having one of the largest armed forces and the greatest armament program in socalled peace time.

Appropriations will reach an all time peak, and taxes must be levied to pay the bill. Taxation will in time reach the point of confiscation, and nothing can sew the seed of discontent more than a confiscatory tax. Taxation forced our ancestors to fight for their freedom, and it may in the end bring about our destruction, if we continue the course we are presently following. Discontent among our people is the aim and goal of the Soviet Union and once accomplished victory is theirs.

May 1951, God willing, save us from ourselves. May it see the return of our boys to their homeland, to be greeted by a nation, united. May our leadership realize in time the futility of their efforts to fight the battles of all other nations to prevent the trend to communism; and may they have the vision to prevent the spread of this deadly reptile in our

#### **Bouquet for Vaughan**

SOME PEOPLE will hardly be-lieve it, but herewith is a bouquet to my old deep-freeze pal, Gen. Harry Vaughan.

Ever since the Korean war, 10,-000 servicemen have been wandering the streets of Washington with no place to go and none of the hospitality shown them during World War II. For the nation's capital-like a lot of other cities-hasn't realized that with the cold war now warm, we civilians ought to shift

our bospitality from cold to warm. An exception in General Vaughan who has been quietly raising cain with the treasury and Jess Larson, chief of the general services of supply, in order to pry loose the old Belasco theatre for the use of the American Legion and other veterans' groups in entertaining serv-

The Belasco theatre enjoys one of the most central locations in Washington. Diagonally across Lafayette square from the White Rouse, it is adjacent to the old Dolly Madison house where the wife of the fourth president of the United States entertained in the early days of the republic. But because legitimate theatres have long been closed in the nation's capital, the Belasco -believe it or not-is filled with old government files and canceled

And the treasury department, whose files are chiefly concerned, won't release the theatre to the veterans for entertainment pur-

First stumbling block was a treasury claim that it would cost \$20,000 to transport the files to anoffered to transport the files in army trucks, free.

Then the treasury came up with a new argument—that it would cost the government \$75,000 to find other storage space for the files. Furthermore, the treasury wants an armed guard to be placed over its canceled checks and it's more convenient to keep a guard over them in the Belasco theatre.

But what Secretary of the Treasury John Snyder doesn't seem to realize is that \$75,000 a year is chickenfeed compared to the morale and morals of 10,000 young Americans who don't want to be away from home, but who in serving their country have to be away from home, and need some place to relax evenings.

General Vaughan, recognizing this problem, has done his best to cut red tape. But so far his friends John Maragon and Joe Major seem to have been more successful with Jess Larson regarding surplus property in the past than the general is now regarding hospitality for

For when Morris wheeled his ice truck into the parking lot at the Reorganized Latter Day Saint auditorium where Truman was being entertained at lunch, he was met by two secret service agents. And a new method of delivery was set for the iceman that day.

Morris was told to leave his pocket knife, his ice pick, and his ice tongs in the truck. He was required to carry the 50-pound chunk of ice to the door of the building in his arms. There the ice was washed -twice-and then handed to a worker inside the building.

## Logging It On TV

By JAY METZ

One thing that cooled me off considerably on TV the other night was the eight straight minutes of commercials from 5:52 p.m. until 6 p.m. It was most discouraging. This was in addition to usual commercials which run all day long and are thrown at us here and there throughout the other progeams. The odd thing was that a fine educational film on Tuberculosis was being shown. Suddenly this film was stopped and the announcer said, "Sorry but time has run out on the showing of this dren, Emily Claire and Jimmy, minutes we had (1) Betty Hugh Triton Oil, followed by the R. C. My personal reaction is that, had I been a prospective TV customer at the time, the salesman would have lost a sale. You salesman ought to plead your case. On the other hand, one suggestion to WD-SU-TV is to go ahead and run your commercials - run them solid from 5:45 to 6 p.m. and get them off your chest and ours. #### RED CROSS NOTES

Ladies of the Womans Society of Christian Service entertained many of the older veterans at the Gulfport V. A. Hospital Thursday, December 21, 1951, with a Christmas party.

A bright Christmas stocking, filled with goodies, was given each one and cookies, candy and hot chocolate were served.

Professor George Wimberly accompanied a group of twelve chorus boys of Bay High School, who visited the different wards, singing Christmas carols ...

The following ladies assisted Mrs. S. J. Mauffray, president: Mesdames W .L. Bourgeois, Douglas Bourgeois, Ernest Yates, Horace Farr, Frances de Valin, W. W. Stockstill and W. W. James.

Each month one local organization entertains a group of veterans from the Gulfport Vete\_ rans Hospital, in Bay St. Louis, but for Christmas, these ladies gave the party at the hospital. This work is a part of the Hancock County Chapter of Volunteer Services of the American Red Cross.

The veterans of Ward J, about 126 in number, at the Gulfport V. A. hospital were guests of a group of young people known as 'The Square Dancers Group of Lakeshore" with the Ola Moran band furnishing the music. Mr and Mrs. Moran and Mrs. Jules E. ## With a Little Strategy Charlie Out-Maneuvers Blonde 'Digger'

-By BILLY ROSE-

At least four times in the past week I've been buttonholed on Broadway and asked, "Have you heard what happened to Charlie Feltus?" Well, I have, but on the off-chance that you haven't, perhaps I ought to bring you up to date . . .

For as long as I can remember, Charlie Feltus has been a promoter of things and people, and by and larcenous he has always made a pretty nice dollar at it. However, like a lot of other Times Squareheads, he has never held on to these dollars for long because of a weakness for bangtails and blondes.

In recent months, to hear the wisenheimers tell it, it's been rough going for Charlie in both depart-

ments seeing as how (a) most of his earnings have been going into the jewel box of a platinum-mopped tootsie named Hazel Duke, and (b) his luck at the race track has

#### Survey of Health In Mississippi

Making known the status of Mis sissipians' health, State health Officer Felix J. Underwood stated: "In public health work, as in any other field, the end of the year gives occasion for analysis of progress, or lack of progress, made and for subsequent determination of what should be done during the coming year."

"It is encouraging to note," Dr Underwood said, "that only two communicable diseases, 7th and 8th ranking pneumonia and TB, are among the ten leading causes of death. Tuberculosis is annually causing fewer deaths, primarily because cases are being discovered in the early stages, when treatment is most effective. Further evidence of progress in the control of communicable diseases in the state is evidenced by the fact that no deaths have been assigned to smallpox since 1945; and both ma-Haria and typhus fever have been girtually eradicated. A significant ecline is noticeable in the numher of primary and secondary cases of syphillis found by private physicians and health deartments. Encouraging are, the results of a study being made in two counties to determine rate of production of congenital syphillis in the newborn of the negro popula-

Latest tabulations for the state according to Dr. Underwood, reveal the leading causes of death as heart disease, other circulatory conditions, cancer, certain diseases of early infancy, accidents nephritis, pneumonia, tuberculosis homicide, and hardening of the arteries. First-ranking heart disease accounted for about 27 per cent of all deaths in the state. Dr. Underwood called the heart disease problem "a challenge in education, case-finding, and treatment to physicians and public health workers." Certain diseases of early infancy, the 4th highest cause, accounted for 6 per cent of the total deaths; and accidents, in 6th place, caused 5.7 per cent of all health policies during 1951," deaths. The major diseases of the stated Dr. Underwood. "The coneart, circulatory system, and kidneys caused 42.7 per cent of the professors, the citizenry, and the

Among the programs designed yo reduce illness and death is canver control, which, stated Dr. Un-Merwood, "includes professional education seminars for doctors rhroughout the state and more dmissions to tumor clinics and more follow-ups on patients for reatment."

The lowest maternal death rate in Mississippi's history has been yecorded, but studies reveal the need of better control of premayure birth, according to the State Health Officer. Three new denal hygienists are now serving the state and considerable work ontinues in the form of sodium Muoride demonstrations. Recenty the Board of Health approved, under certain conditions, the fluoridation of public water sup-

Increased consciousness of the importance of mental health to total health has led to in service training of public health nurses in mental health concepts. This training, as well as educational work among lay groups, is being given by the Child Guidanace taff and a psychiatric nurse consultant on loan from U. S. Public Health Service.

Although services of a number public health nurses were ost during the year, nurses gain. d exceeded the number lost. Industrial expansion in the state has brought on increased supervision of processes in plants and the personal health of employees. Awareness among people of the need for sanitary conditions is evidenced in the sanitary land fills and other improved methods of garbage disposal found over he state. "In the last half of 1950," Dr. Underwood stated, ommunities let over three milion dollars worth of contracts for water supplies and sewage disposal systems."

#### GRASSES, LEGUMES TESTED FOR USE IN **EROSION CONTROL**

Eight Grasses and Four Legumes Appear Most Satisfactory Among 48 Tested at North Mississippi Branch Experiment Station

State College, Miss. - Eight grasses and four legumes are showing promise in an erosion control test being conducted at the North Mississippi Branch Experiment Station at Holly Springs Forty-eight different grasses and legumes were planted under sim. ilar conditions in the fall of 1947 and the spring of 1948 and their growth is being observed.

Grasses which have been mos succesful afe: Fescue, rescue grass, Jaragua, yellow bluestem Blackwell switchgrass, weeping lovegrass, narrowleaf Wilming. ton bahia, and little bluestem.

Most successful legumes are ladino clover, lanceleaf crotal. aria, trefoil, and decumbent lespedeza.

W. M. Broadfoot, of the U. S Forest Service, is conducting the test in cooperation with the North Mississippi Branch Eperiment Sta. tion. Mr. Broadfoot warns that further tests are necessary before definite conclusions can be drawn as to the best species for planting on severely eroded areas.
